

## Ozone Therapy Moncton

Ozone Therapy Moncton - Many individuals think ozone has excellent healing properties, while other individuals have argued that those claims are non-scientific and that ozone has no proven benefits. For many years, there has been a lot of debate and controversy regarding this particular topic.

The most recent clinical tests have evaluated the actions, mechanisms, together with possible toxicity of ozone thanks to the advent of precise medical ozone generators. There is a capacity for ozone to oxidize organic compounds. When present in smog, ozone has different common toxic effects on the respiratory tract. Advocates of ozone therapy say it has numerous health benefits. The gas is made from medical grade oxygen and in medical use, is administered in precise therapeutic doses, although, never by way of inhalation.

Most US states prohibit the marketing of ozone generators, clinical trials in ozone therapy and even research and its medical use. Therapeutic use of ozone is not endorsed by medical associations in any English speaking nations, or by whatever health authorities, therefore, physicians who prescribe or administer ozone therapies risk losing their medical licenses. There is anecdotal proof of ozone therapy being helpful and even causing remission in different illnesses, however, only some of these life saving administrations have been documented and verified.

### Historical Origins of Ozone Therapy

Soon following the discovery of ozone in the year 1856, it was used in health care to be able to sterilize surgical instruments and disinfect operating rooms. The use of ozone to disinfect drinking water of bacteria and viruses was well established in mainland Europe by the end of the 19th century.

During WWI, in the years 1914 to 1918, doctors were familiar with ozone's antibacterial capability and with few other medical resources available to them, applied it topically to infected wounds. It was found that it had hemodynamic properties and anti-inflammatory properties while remedying the infection.

### Evidence of Medical Benefits of Ozone Therapy

There are various unbelievable promotional claims made by marketers of ozone generators that it is a marvelous treatment for all illness consisting of cancer and AIDS, however, these claims remain unproven. A lot of debate surrounds ozone equipment and therapy itself. Critics claim that this option has given numerous people false hope and that it is thus quite dangerous.

There are modest claims stating that the narrow use of ozone by injection into synovial fluid and tissues that surround the joints and bones, and not into blood vessels, simply promotes the body's own mechanisms for healing musculoskeletal lesions along with modest inflammation and tissue oxygenation.
